Temporary vs Permanent Status Inconsistency

Respondent's own SOW treats temporary and permanent TL shift moves differently, but my status appears to change from temporary PM to permanent PM without a clear ticket, approval, notice, or explanation.

When I initially accepted the PM assignment, it was presented to me as a temporary PM assignment. After I filed my initial EEOC complaint, Respondent later told me the PM assignment had actually been permanent, not temporary. However, Respondent's own TL Shift & Waitlist records continued to show me as PM / Temporary through at least February 2025. Then, when I was re-added in July 2025, my record showed PM / Permanent with a new request date of July 17, 2025, without notice, explanation, approval documentation, or a CFS ticket.

CAR TL SHIFT CHANGES

Last Update: 3/26/2025

Ownership & Audiences	Business Unit: CMA (Open File) Business Function: CAR Field Operations Support Associated Parties (if applicable): Leadership	Content Owner: Tyler Wilding Manager: Edina Markus
General Information	SOW Description: The purpose of this standard work is to ensure the process for Team Lead (TL) shift changes is followed correctly.	Risk/Priority Level: Green Comments:
Processing	Estimated Time: 1 hour Frequency: Monthly	Required Access/Systems: Microsoft Excel, Miro, SharePoint

Process Steps		
Process	Activity	Comments
A Department Manager: Communicate TL shift request to CAR Field Support	A Department/Area manager completes a TL Shift/Status Change ticket	DMs always submit the ticket, but a permanent shift move requires their director's approval. DMs can approve temporary shifts alone.
B CAR Analyst: Complete ticket, update staffing sheet and Miro.	- Review ticket - Confirm TL has been a CAR TL for at least 12 months (see comments for rules) - If they qualify for a permanent shift change, review list to see if there are other TLs that qualify - Respond with closure of ticket whether the shift change is permanent, temporary or further consideration is needed, with reasoning - Update in relevant documents (Staffing sheet, movement records, scorecard, etc.) - Tag Hierarchy and Access in the ticket if the move is permanent - Update TL assigned box in Staffing MIRO with new shift	≥12 months tenure as a CAR TL allows for a permanent shift change. <12 months allows for a temporary shift change due to business need - Requests should be handled in chronological order

REFERENCE: Process column should capture the high-level steps in the process, while the Activity column should provide the detailed-level steps. The Comments column should be used to share best practices, warnings, and other relevant information.

The screenshot displays a web application interface for managing shift requests. The main content area features a table with columns for 'TL', 'Shift Requested', 'Date Requested', 'Months as CAR TL', 'Current Shift', 'Temp/Perm', and 'Qualifies'. The table lists several requests, with the most recent one for 'Nathan Khan' on 8/13/2023, requesting a PM shift, currently assigned to PM, and qualified. A sidebar on the right shows a 'Version History' for the selected row, listing updates from August 10, 2023, back to February 25, 2023. The interface includes a top navigation bar with tabs like 'Chart Reports', 'DLN Applications', 'Custom Reporting', 'Development Control', 'Home - Workday', 'Procedure', 'Unit', 'Workforce Manage...', and 'TL Tools/Forms'. A search bar and a 'Save a Copy' button are also visible at the top.
